

Walk Around the Garden to Explore

- Read about the Plants -

There are several metal signs posted throughout the garden, at specific plants. Three examples are shown below.

1. Ask the students if they can see signs posted around the garden.
2. To minimize chaos, choose one student to lead the group to walk to that sign.
3. Ask one student to read the sign to the group.
4. Ask another student to lead the group to the next sign, and repeat!

If the information is new to you, this is an opportunity to let students know you are learning too!
